

**NEW  
SEMINAR**

# *A Path to Zero Waste*

**D-Lab Project Framing Seminar  
FALL 2019**

## **Course Description:**

This 2-hour/week seminar leads students through a process of framing projects concerned with sustainable waste management solutions including but not limited to landfills, food waste, and recyclable materials. Using the D-Lab 4-lens framework (social, environmental, economic, and technical), student teams will work on real-world projects to create design briefs addressing the client's needs. All assignments and presentation preparation will be completed in class.

**Graduate students from any department and undergraduates with permission from instructor are welcome to register.**

**CRN:** ABT298

**Days and Time:** Mondays from 10am-11:50am

**Location:** TBD

**More Info:** <https://piet.ucdavis.edu/d-lab-0-2019/>

## **Looking for students interested in:**

- Learning about sustainable waste management
- Facing challenges and designing solutions
- Participating in local and international waste management projects

**Learn more about the role of managing waste on solving real world issues.**

## **Guest Speakers & Case Studies**

Students will work with clients to take action on pressing global issues through dialogue, design, and dissemination.
