A Path to Zero Waste
D-Lab Project Framing Seminar
FALL 2019

Course Description:
This 2-hour/week seminar leads students through a process of framing projects concerned with sustainable waste management solutions including but not limited to landfills, food waste, and recyclable materials. Using the D-Lab 4-lens framework (social, environmental, economic, and technical), student teams will work on real-world projects to create design briefs addressing the client’s needs. All assignments and presentation preparation will be completed in class.

Graduate students from any department and undergraduates with permission from instructor are welcome to register.

CRN: ABT298
Days and Time: Mondays from 10am-11:50am
Location: TBD

Learn more about the role of managing waste on solving real world issues.

Guest Speakers & Case Studies
Students will work with clients to take action on pressing global issues through dialogue, design, and dissemination.
