

# **GEOLOGY 35**

## **Rivers of California**

### **Spring Quarter, 2020**

This 3-unit lecture class provides a broad overview of the geology, hydrology, ecology and management of California's rivers. Learn about river processes and the history of water development in California (It all started with gold!).

The course is open to all students and includes an optional field trip to go whitewater rafting on the South Fork American river. Earn extra credit by getting wet and experiencing rivers first-hand!
