

SUMMER INTERNSHIP OPPORTUNITY

Peterson Brustad Inc. (PBI) provides engineering consulting services to the water industry. Founded in 2005, we specialize in developing innovative and cost-effective solutions for our clients' most challenging water resources, drinking water, wastewater and recycled water projects. Our office is located in Folsom, CA next one of Folsom's numerous paved recreational trails along Lake Natoma. Folsom also tops the list of California cities as the best place to raise a family. *PBI is a small specialized firm (15-20 employees) with a strong family culture that encourages camaraderie among our employees. The success of our company is a result of the quality staff that we have assembled over the years.*

SOLVE PROBLEMS • CREATE VALUE • PROVIDE OPPORTUNITIES

Peterson Brustad, Inc. (PBI) has an immediate need for water resources engineer intern. As a member of our team, the successful candidate will perform a variety of Civil and Water Resource planning and design tasks for projects involving:

- Water supply design (pipelines, pump stations, storage tanks, etc)
- Levee design
- Hydrologic/Hydraulic modeling (HEC-RAS, HEC-HMS, HEC-FDA, etc.)
- Regional flood management planning
- Floodplain mapping and interior drainage analyses

Position requirements include:

- Working toward BS degree in Civil Engineering
- EIT preferred but not required
- H&H modeling, GIS, AutoCAD, and Civil3D experience a plus

An outgoing, entrepreneurial spirit is encouraged within a self-motivated office culture. Your role on projects will be based on your abilities and qualifications.

We are an Equal Opportunity Employer.

If you would like to apply for this position, please send your cover letter, resume, and unofficial transcripts to recruitment@pbieng.com.
